Frankia symbiosis

Proceedings of the 12th International Meeting on Frankia *and Actinorhizal Plants, Carry-le-Rouet, France, June 2001*

Guest editors:
P. Normand, J.O. Dawson & K. Pawlowski

Introduction vii

***Frankia* inoculation, soil biota, and host tissue amendment influence *Casuarina* nodulation capacity of a tropical soil**
J.F. Zimpfer, C.M. Kaelke, C.A. Smyth, D. Hahn and J. O. Dawson 1–10

An assessment of soil enrichment by actinorhizal N_2 fixation using $\delta^{15}N$ values in a chronosequence of deglaciation at Glacier Bay, Alaska
S.J. Kohls, D.D. Baker, C. van Kessel and J.O. Dawson 11–17

Effects of land irrigation with partially-treated wastewater on *Frankia* survival and infectivity
W. F. Sayed 19–25

The production and utilisation of monoclonal antibodies for identification of a *Frankia* strain utilised as inoculum for *Casuarina equisetifolia*
A. Hahn, B. Hock, A. Kesavan, M.M. Animon, R. Narayanan and C.T. Wheeler 27–33

The effects of fire on soil nitrogen associated with patches of the actinorhizal shrub *Ceanothus cordulatus*
B.B. Oakley, M.P. North and J.F. Franklin 35–46

Alder and lupine enhance nitrogen cycling in a degraded forest soil in Northern Sweden
D.D. Myrold and K. Huss-Danell 47–56

Germination and physiological properties of *Frankia* spores
G.D. Krumholz, M.S. Chval, M.J. McBride and L.S. Tisa 57–67

Improving dispersed growth of *Frankia* using Carbopol
O.T. Harriott and A. Bourret 69–74

Identification and expression studies of a catalase and a bifunctional catalase-peroxidase in *Frankia* strain R43
F. Tavares, L. Bernardo and A. Sellstedt 75–81

Effect of electroporation conditions on cell viability of *Frankia* EuI1c
A.K. Myers and L.S. Tisa **83–88**

Molecular cloning and characterization of *adr* and *ivd* genes from *Frankia* EuIK1 strain
H.J. Kwon, C.J. Oh, H.B. Kim and C.S. An **89–96**

Cloning, characterisation and phylogenetic analysis of the *sigA* σ^{70} factor gene sequence from the actinomycete *Frankia*
D. Blaha and B. Cournoyer **97–106**

An insertion sequence unique to *Frankia* strain ArI5
T.R. John, J. Wiggington, J.V. Bock, R. Klemt and J.D. Johnson **107–113**

Genomic fingerprinting of *Frankia* strains by PCR-based techniques. Assessment of a primer based on the sequence of 16S rRNA gene of *Escherichia coli*
J.M. Igual, A. Valverde, R. Rivas, P.F. Mateos, C. Rodríguez-Barrueco, E. Martínez-Molina, E. Cervantes and E. Velázquez **115–123**

Progress on the genetics of the N_2-fixing actinorhizal symbiont *Frankia*
C. Lavire and B. Cournoyer **125–137**

Ammonium assimilation in root nodules of actinorhizal *Discaria trinervis*. Regulation of enzyme activities and protein levels by the availability of macronutrients (N, P and C)
C. Valverde and L.G. Wall **139–153**

The regulation of nodulation, nitrogen fixation and ammonium assimilation under a carbohydrate shortage stress in the *Discaria trinervis-Frankia* symbiosis
C. Valverde and L.G. Wall **155–165**

Seasonal flooding regimes influence survival, nitrogen fixation, and the partitioning of nitrogen and biomass in *Alnus incana* ssp. *rugosa*
C.M. Kaelke and J.O. Dawson **167–177**

Tripartite associations in an alder: effects of *Frankia* and *Alpova diplophloeus* on the growth, nitrogen fixation and mineral acquisition of *Alnus tenuifolia*
T. Yamanaka, C.-Y. Li, B.T. Bormann and H. Okabe **179–186**

Nodulation potential of soils from red alder stands covering a wide age range
K.J. Martin, N.J. Posavatz and D.D. Myrold **187–192**

A possible role for phenyl acetic acid (PAA) on *Alnus glutinosa* nodulation by *Frankia*
Y. Hammad, R. Nalin, J. Marechal, K. Fiasson, R. Pepin, A.M. Berry, P. Normand and A.-M. Domenach **193–205**

Molecular phylogeny of *Alnus* (Betulaceae), inferred from nuclear ribosomal DNA ITS sequences
E. Navarro, J. Bousquet, A. Moiroud, A. Munive, D. Piou and P. Normand **207–217**

Evolutionary implications of nucleotide sequence relatedness between *Alnus nepalensis* and *Alnus glutinosa* and also between corresponding *Frankia* microsymbionts
R. Varghese, V.S. Chauhan and A.K. Misra **219–227**

Choosing a reporter for gene expression studies in transgenic actinorhizal plants of the *Casuarinaceae* family
C. Santi, S. Svistoonoff, L. Constans, F. Auguy, E. Duhoux, D. Bogusz and C. Franche **229–237**

Expression pattern of *ara12, an *Arabidopsis* homologue of the nodule-specific actinorhizal subtilases *cg12/ag12***
S. Svistoonoff, L. Laplaze, F. Auguy, C. Santi, E. Fontanillas, E. Duhoux, C. Franche and D. Bogusz **239–244**

Volume 254 No. 2

Changes in soil phosphorus fractions following positive and negative phosphorus balances for long periods
L. Blake, A.E. Johnston, P.R. Poulton and K.W.T. Goulding **245–261**

A widespread Neotropical *Bradyrhizobium* lineage associated with *Machaerium* and *Desmodium* (Papilionoideae)
M.A. Parker **263–268**

Relationships between soil potassium supply characteristics based on soil solution concentration and buffer power and field responses of winter wheat and maize
A. Schneider, P. Castillon and S. Pellerin **269–278**

Effects of atmospheric CO_2 enrichment, water status and applied nitrogen on water- and nitrogen-use efficiencies of wheat
F. Li, S. Kang, J. Zhang and S. Cohen **279–289**

Partitioning evapotranspiration fluxes from a Colorado grassland using stable isotopes: Seasonal variations and ecosystem implications of elevated atmospheric CO_2
D.F. Ferretti, E. Pendall, J.A. Morgan, J.A. Nelson, D. LeCain and A.R. Mosier **291–303**

Accurate root length and diameter measurement using NIH image: use of pythagorean distance for diameter estimation
K. Kimura and S. Yamasaki **305–315**

Turnover and distribution of root exudates of *Zea mays*
Y. Kuzyakov, A. Raskatov and M. Kaupenjohann **317–327**

Growth of micropropagated bananas colonized by root-organ culture produced arbuscular mycorrhizal fungi entrapped in Ca- alginate beads
M.C. Jaizme-Vega, A.S. Rodríguez-Romero, C. Marín Hermoso, and S. Declerck **329–335**

Impact of picolinic acid on the chromium accumulation in fodder radish and komatsuna
L. Simon, J. Csillag and I. Szegvári **337–348**

Modelling yield losses of aluminium-resistant and aluminium-sensitive wheat due to subsurface soil acidity: effects of rainfall, liming and nitrogen application
C. Tang, S. Asseng, E. Diatloff and Z. Rengel **349–360**

Nitrous oxide emissions following application of residues and fertiliser under zero and conventional tillage
E.M. Baggs, M. Stevenson, M. Pihlatie, A. Regar, H. Cook and G. Cadisch **361–370**

Water use and water-use efficiency of the invasive *Centaurea maculosa* and three native grasses
P.S. Blicker, B.E. Olson and J.M. Wraith **371–381**

Arbuscular mycorrhizae respond to plants exposed to elevated atmospheric CO_2 as a function of soil depth
M.C. Rillig and C.B. Field **383–391**

Interactions between ammonium and pH of the nutrient solution supplied to gerbera (*Gerbera jamesonii*) grown in pumice
D. Savvas, V. Karagianni, A. Kotsiras, V. Demopoulos, I. Karkamisi and P. Pakou **393–402**

Evidence for the involvement of biotic factors in the yellowing disease of Norway spruce (*Picea abies* [L.] Karst.) at higher elevations of the Bavarian Forest
J. Nechwatal and W.F. Oßwald **403–414**

Plant uptake and leaching of copper during EDTA-enhanced phytoremediation of repacked and undisturbed soil
T. Thayalakumaran, B.H. Robinson, I. Vogeler, D.R. Scotter, B.E. Clothier and H.J. Percival **415–423**

Element storage in native, agri-, and silvicultural ecosystems of the Brazilian savanna
J. Lilienfein and W. Wilcke **425–442**

Root uptake and translocation of radiocaesium from agricultural soils by various plant species
S. Staunton, P. Hinsinger, A. Guivarch, F. Brechignac **443–455**

Response of the invasive *Centaurea maculosa* and two native grasses to N-pulses
B.E. Olson and P.S. Blicker **457–467**

The effect of a single application of cow urine on annual N_2 fixation under varying simulated grazing intensity, as measured by four ^{15}N isotope techniques
J.C. Menneer, S. Ledgard, C. McLay and W. Silvester **469–480**

Instructions to authors **481–484**

Volume contents **485–488**

Author index **489–490**
